

Campus Event Management System

Product Vision

Problem Statement:

Students and faculty often struggle to stay up to date about campus events due to scattered communication channels like emails, notice boards, and social media. Existing solutions do not provide a platform for event discovery, attendance tracking, and RSVP management which then leads to missed events and low participation.

Target Audience:

Our product is designed for students, teachers, and campus event organizers who needs a simple system to view and register for the upcoming academic and extracurricular events, and track attendance.

Value Proposition:

Our product offers a campus management platform that helps users discover, RSVP, track attendance and even receive notifications. Unlike conventional communication methods, this system will ensure an improved event visibility, provide timely reminders and reduce missing events.

Key Features and Functionality:

- Event Listing: Show a list of upcoming campus events, including workshops, seminars, and extracurricular activities.
- RSVP and Participation: Allow students and faculty to RSVP for events and track their attendance status.
- Notifications and Reminders: Send event notifications and reminders to registered users.
- Event Management: Enable organizers to create, update, and manage events efficiently.

Goals and Objectives:

- Increase user adoption rates by around 40% within one semester.
- Improve user satisfaction scores to 9.5 out of 10 or above.
- Enable campus-wide usage within one academic year (Our product is an academic project and is not intended for commercial usage.)

Vision Statement:

We aim to help students and faculty to actively participate in campus life and improve overall event management. Our vision is to create a user-friendly and unified platform that improves campus engagement by making events more accessible, organized, and impactful.
